

Uniting Innovation, Engineering, Manufacturing, and Distribution

Sound Deadening Rubber Cab Flooring

PowerRail, an AAR M-1003 Quality Company,
proudly presents the latest in
noise-deadening cab flooring.

Complete Cab Enhancement Improve Safety, Comfort, and Durability

PRD16186612

34.5" x 34.5" square mats

- Meets FRA low smoke/low flame specification
- Available in ¼", ½", 1" or 2" thickness

This unique Locomotive flooring, manufactured from recycled tire crumb rubber, has proven to reduce noise levels in the cab by 2 to 5 decibels after installation and has a 40% non-transmittance of vibration.

These rugged and durable mats stand up to even the toughest conditions, including studded winter boots.

In addition, these flooring pads create a slightly cushioned, more comfortable feel, helping to reduce strain on the lower back.

Installed with our Bold Step Safety Treads (**PRD16187175**) creates a non skid surface and reflects ambient light for step recognition and improved safety.

Combine our Sound Deadening Rubber Cab Flooring with our Bold Step Safety Treads to provide added comfort AND safety for your crew.
